INTELLIGENT EMERGENCY BRAKING & WARNING ASSISTANTS

LOOKS GOOD, LOOKS AHEAD.

Thanks to innovations like Automatic Emergency Braking¹, being on the road is now much safer for you and others.

¹Optional on both models. Orderable now, available from Autumn 2017. Automatic Emergency Braking with Pedestrian Detection works automatically above 5 km/h and below 85 km/h. From 5 to 30 km/h the deceleration metric to reduce the impact speed of the collision is 0.9 g. From 30 to 85 km/h the system reduces the speed by a maximum of 22 km/h. Above this threshold, the driver needs to brake himself/herself to reduce the speed even further. Operational speed range of Automatic Emergency Braking with Pedestrian Detection depends on the detected obstacle (mobile obstacle: from 5 to 85 km/h; fixed obstacle: from 5 to 80 km/h; pedestrian: from 5 to 60 km/h). Opel driver assistance systems are intended to support the driver within the limitations intrinsic to the system. The driver remains responsible for the driving task. ²Optional on both models in conjunction with Navi 5.0 IntelliLink. ³Optional on both models as part of Park and Go Pack/Park and Go Pack Plus.
