Bolt EV Premier in Nightfall Grey Metallic
(extra-cost colour) with available features.

CHEVROLET BOLT EV: THE MOST AWARDED ELECTRIC VEHICLE OF THE YEAR!

The award-winning Bolt EV is an all-electric crossover that offers up to 383 kilometres of pure electric range on a full charge.² Built with the utility of a crossover from the inside out, this vehicle has plenty of head- and legroom, and with folding rear seats, it has up to 1603 litres of maximum cargo space.³

Because it's a vehicle that is built around your driving needs, charging the battery is as easy as plugging in your smartphone. The perfect combination of range, utility and style, Bolt EV is not just a great electric vehicle. It's a great vehicle, period.

Immerse yourself more fully in Bolt EV by using the icons placed throughout this brochure to enjoy an interactive experience.

VISIT MEETBOLTEV.COM TO BEGIN THE BOLT EV INTERACTIVE EXPERIENCE.

¹ Based on recognized industry awards for October 2016 through September 2017. ² 2018 Bolt EV energy consumption and range ratings based on GM testing in accordance with Government of Canada approved test methods. Refer to vehicles.nrcan.gc.ca for details. Full charge required. Actual consumption, driving range and energy cost will vary based on temperature, driving conditions, use of HVAC and/or accessories, and how you drive and maintain your vehicle. ³ Cargo and load capacity limited by weight and distribution.

FIND NEW ROADS™

RANGE

Bolt EV Premier in Arctic Blue Metallic (extra-cost colour) with available features and Chevrolet Accessories.

GOING THE DISTANCE. Bolt EV offers an estimated range of up to 383 km! If your daily commute is about 80 km round trip, you'll have more than enough range to get through an average day – and you could go up to three or four days, or even more, without needing to plug in.¹

LOCATION-BASED CHARGING. Bolt EV makes charging efficient, with home and away settings for recharging. You can delay charging to take advantage of off-peak electricity rates when you're at home and begin charging immediately when you're away.

CHOOSE YOUR CHARGE. When it comes to charging, Bolt EV is centred around your driving needs. Plenty of charging options and personalized settings allow you to choose your charging times to fit your schedule and even your location for high efficiency.

¹ 2018 Bolt EV energy consumption and range ratings based on GM testing in accordance with Government of Canada approved test methods. Refer to vehicles.nrcan.gc.ca for details. Full charge required. Actual consumption, driving range and energy cost will vary based on temperature, driving conditions, use of HVAC and/or accessories, and how you drive and maintain your vehicle. ² Charging rate varies based on output of the charge unit, vehicle settings and outside temperature.

3

1. EXPLORE YOUR OPTIONS. Charging your Bolt EV is as easy as plugging in your smartphone with the AeroVironment™ 240-volt charging unit (available at participating Chevrolet dealers – professional installation required). This charging unit provides more power and will charge your Bolt EV faster than a 120-volt outlet.

2. KNOW WHERE YOU STAND. Bolt EV makes it easy to monitor range. The Energy History screen provides a bar graph format that displays energy efficiency in 8-kilometre intervals for the previous 80 kilometres.

3. CHARGE ON THE GO. A DC Fast Charging provision is standard on Bolt EV. DC Fast Charging is available at conveniently located public charging stations and provides up to 145 km of range in about 30 minutes of charge.¹ Use the myChevrolet™ mobile app² to find the closest DC Fast Charging station.

¹ Charging rate varies based on output of the charge unit, vehicle settings and outside temperature. ² Available on select Apple and Android devices. Service availability, features and functionality are subject to limitations and vary by vehicle, device and the plan you are enrolled in. Device data connection required. Visit onstar.ca for more details.

*“Quick on its feet and fun to drive,
Bolt EV gives Tesla a run for its money.”*

— Car and Driver

1 2018 Bolt EV energy consumption and range ratings based on GM testing in accordance with Government of Canada approved test methods. Refer to vehicles.nrcan.gc.ca for details. Full charge required. Actual consumption, driving range and energy cost will vary based on temperature, driving conditions, use of HVAC and/or accessories, and how you drive and maintain your vehicle. 2 Based on initial vehicle movement. 3 Feature unavailable in cold weather and at or near full charge. See chevrolet.ca for details.

MAXIMIZE YOUR DRIVE. Bolt EV is an electric vehicle that's fun to drive. It's also engineered to maximize energy and efficiency with features like One Pedal Driving and Regen on Demand,³ for smooth handling and plenty of passing power.

EFFICIENT, EVERYWHERE. One Pedal Driving helps you get anywhere you want to go more efficiently. When driving in Low mode at any speed, One Pedal Driving lets you speed up and slow down

by using only the accelerator pedal.³ When you want to speed up, press your foot down like you normally would. And when you want to slow down, just lift your foot off the accelerator. This means you may use the brake pedal³ less. So instead of losing energy when slowing down, One Pedal Driving helps you generate energy and sends it back to the battery.

EXPLORE YOUR RANGE. Regen on Demand allows you to convert energy

into electricity and transfers it back to the battery. A simple pull and hold of the Regen on Demand paddle on your steering wheel will decelerate your vehicle.³ Of course, you must use your brake pedal if you need to stop immediately.

POWER IS NOTHING WITHOUT CONTROL. The Electronic Precision Shift offers smooth and responsive shifting – and the latest in technology. Bolt EV is the first Chevrolet vehicle to have a shifter that

sends electronic signals to the drive unit to select Reverse, Neutral, Park, Drive and Low. The sleek joystick shifter offers a seamless and effortless experience. And because it eliminates the need for bulky hardware, the centre console area is freed up to provide additional room and a greater sense of personal space.

DESIGN

Bolt EV Premier in Arctic Blue
Metallic (extra-cost colour)
with available features.

CENTURY
AUTO.CA

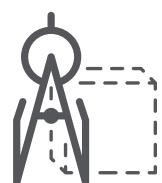

1. LIVING ROOM. Bolt EV offers easy entry and exit for five passengers and all their gear. Rear seats fold down for up to 1603 litres of maximum cargo space,¹ which allows easy loading of large or odd-sized items. The battery placed beneath the floor enables a flat storage surface and a very spacious passenger cabin. The rear cargo area features a deep well with an available false cargo floor for additional storage space.

2. DESIGNED TO PERFORM. Michelin® Energy™ Saver all-season tires with Selfseal® technology offer low rolling resistance and are designed to self-seal in the event of a minor tread puncture such as that made by a nail. The specially engineered 17-in. wheels provide enhanced stiffness to help manage noise and vibration.

3. AN EVOLUTION OF CLASSIC STYLE. A sculpted exterior takes a fresh approach to proportions and also to details like the lamps and grille.

¹ Cargo and load capacity limited by weight and distribution.

Bolt EV Premier interior in Dark Galvanized/Sky Cool Grey with perforated leather-appointed seats.

1 Full functionality requires compatible Bluetooth and smartphone, and USB connectivity for some devices. 2 Vehicle user interface is a product of Apple and its terms and privacy statements apply. Requires compatible iPhone and data plan rates apply. 3 Vehicle user interface is a product of Google and its terms and privacy statements apply. Requires a compatible smartphone running Android 5.0 Lollipop or higher and data plan rates apply. 4 Includes data plan trial for 1 month or 3 GB, whichever comes first. Visit onstar.ca for vehicle availability, details and system limitations. Services and connectivity vary by model and conditions as well as geographical and technical restrictions. Requires active connected vehicle services and data plan. Data plans provided by AT&T or its local service provider. Accessory Power must be active to use the Wi-Fi hotspot.

ADVANCED INTELLIGENCE.

Smart technology helps Bolt EV make every ride a connected one. Important information like your battery levels, range estimation, charge settings and climate controls is readily available on the standard 10.2-in. diagonal Chevrolet MyLink[®] centre display screen and 8-in. diagonal driver cluster.

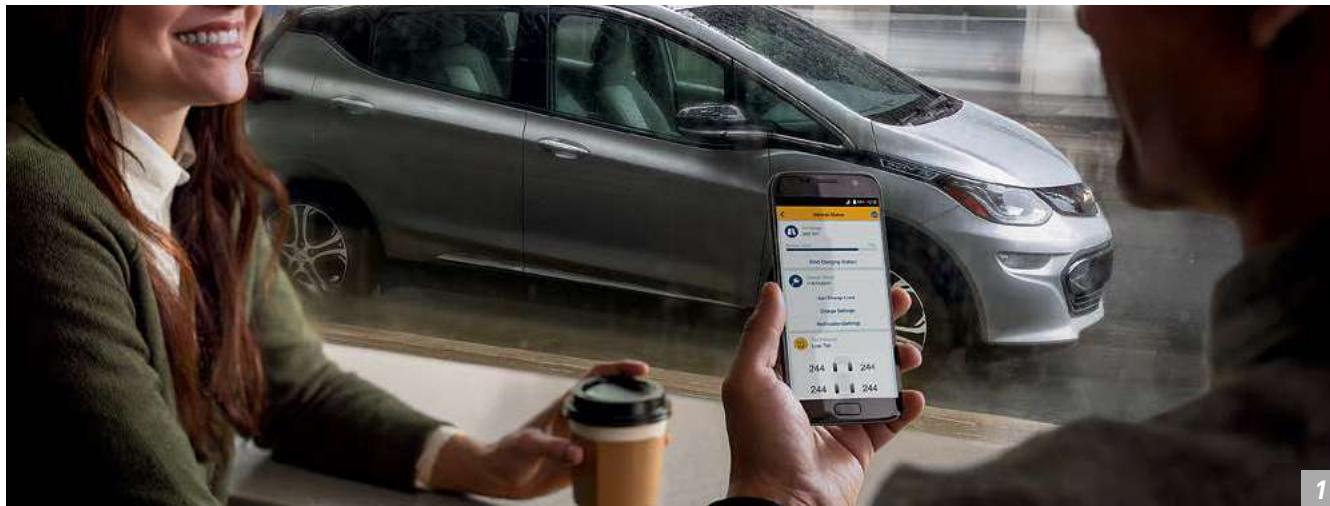

Apple CarPlay™ COMPATIBILITY.²

Take some of your favourite compatible iPhone[®] features and put them on your vehicle's touch-screen display in a smart, simple manner. Access your Phone, Music, Maps and Messages, as well as some of your other favourite apps.

ANDROID AUTO COMPATIBILITY.³

You can quickly and intuitively interact with select smartphone apps with support for Android Auto.[™]³ This system takes some of your compatible Android[™] phone's features and puts them on the Chevrolet MyLink¹ display. You can access your phone, text messages, music, navigation and more.

Wi-Fi IN YOUR BOLT EV. Thanks to available 4G LTE with built-in Wi-Fi[®] hotspot,⁴ you have the ability to seamlessly connect up to seven compatible devices to the Internet. It provides a great in-vehicle experience with a strong signal and reliable connection.

1

2

3

1. myChevrolet MOBILE APP¹

Turn your compatible mobile device into a command centre for your Bolt EV. Create a completely connected experience between your vehicle and your smartphone. Lock the doors², check charge levels and tire pressure, and even remotely start your vehicle² to warm it up while it's charging – all with the tap of a finger.

2. ENERGY USAGE SCREEN. Want to know how much energy you're using? The energy usage screen shows an index score based on factors that may influence energy consumption, such as driving technique, terrain, climate settings and outside temperature.

3. RANGE ANALYSIS. A Confidence Gauge in the configurable Driver Information Centre provides best-case and worst-case scenarios based on recent driving conditions. It analyzes how you trend on efficiency based on real-life driving information.

¹ Available on select Apple and Android devices. Service availability, features and functionality are subject to limitations and vary by vehicle, device and the plan you are enrolled in. Device data connection required. Visit onstar.ca for more details. ² Requires subscription to Remote Access Plan or Premium Access Plan. Services are subject to user terms and limitations, and vary by vehicle model. Unlock feature requires automatic locks. Remote start requires GM factory-installed and enabled remote start system. Visit onstar.ca for more details.

SAFETY

SAFETY STARTS WITH YOU. Safety features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the vehicle Owner's Manual for important feature limitations and information.

CHEVROLET
SAFETY

ADVANCED SAFETY TECHNOLOGY HELPS COVER ALL THE ANGLES.

FRONT PEDESTRIAN BRAKING. At speeds up to 80 km/h, this available system uses a forward-looking camera to survey the road ahead, flashing a warning signal and a series of eight beeps when the vehicle is approaching a pedestrian ahead too fast. If necessary, the system will even automatically apply last-second braking when travelling at low speeds.

LOW SPEED FORWARD AUTOMATIC BRAKING. Available on Bolt EV, camera-based Low Speed Forward Automatic Braking helps mitigate collisions with detected vehicles. The system may even help avoid a collision at very low speeds. The system works at speeds below 80 km/h.

FORWARD COLLISION ALERT. This available feature continually monitors how close your vehicle is to the vehicle in front of you. If the system determines that a front-end collision with a detected vehicle is imminent, it alerts the driver to a potential crash. It also warns the driver if their Bolt EV is following a detected vehicle much too closely.

LANE KEEP ASSIST WITH LANE DEPARTURE WARNING. At speeds above 60 km/h, the available camera-based system monitors road lines and will gently turn the steering wheel if the vehicle begins changing lanes without the use of a turn signal.

LANE CHANGE ALERT WITH SIDE BLIND ZONE ALERT. This available feature has radar sensors in the rear corners of the vehicle to help detect fast-approaching vehicles in the adjacent lanes as well as vehicles in the side mirror blind zones. Amber icons in the exterior mirrors indicate a vehicle's presence.

REAR VISION CAMERA. Standard on Bolt EV, the rear vision camera displays a view of the area immediately behind the vehicle on the 10.2-in. diagonal colour touch-screen – making it easier to see what's behind you while backing up.

REAR PARK ASSIST. This available feature helps you back up by sounding an audible alert and providing visual indication on the rear vision camera display when it detects certain stationary objects in close proximity behind the vehicle.

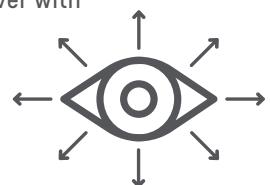

INTELLIBEAM HEADLAMPS. When oncoming headlamps are sensed or when tail lamps are detected in front of you, the available IntelliBeam™ high beam assist intuitively adjusts between low and high beams.

SURROUND VISION. This available feature makes parallel parking and manoeuvring at low speeds into tight garage spaces so much easier. Using four strategically placed cameras, Surround Vision gives you a bird's-eye view of the area immediately surrounding your Bolt EV on the standard 10.2-in. colour touch-screen display, allowing you to see the areas behind and around you. You'll get the full view with just one look.

REAR CAMERA MIRROR. The available Rear Camera Mirror technology projects a wide-angle view of the area behind your Bolt EV with the easy flip of a switch on your interior rear-view mirror. The mirror surface doubles as a video screen and provides the driver with a full, high-resolution view without the obstruction of head restraints, rear-seat passengers or cargo so you can see more of the approaching traffic behind you.

OTHER OWNERSHIP PRIVILEGES AND PROGRAMS⁵

- GM Protection Plan (GMPP) – the only extended service plan backed by the resources and commitment of General Motors, GMPP may be purchased at the time of sale or subsequently during the New Vehicle Limited Warranty period.
- Chevrolet Certified Service – to help your Chevrolet vehicle live up to its performance promise, Chevrolet Certified Service – found exclusively at your Chevrolet dealer – is there. With all the engineering excellence in your vehicle, GM-trained technicians have the expertise to care for all of it.
- Chevrolet Owner Centre – as an owner, take advantage of the Chevrolet Owner Centre. This online owner's destination gives you access to contests, current offers and the latest driving and maintenance tips. Find out more at mychevrolet.ca.

TO HELP YOU PURCHASE OR LEASE A NEW VEHICLE

- Purchase Financing and Leasing – on-the-spot financing; see dealer for full details⁶

• GM Card[®] – cardholders may redeem Earnings towards the total purchase price or lease down payment of an eligible new Chevrolet car, truck or crossover. Restrictions and limitations apply. For full program details, visit gmcards.ca.

INFORMATION RESOURCES You can find more information about these programs from your Chevrolet dealer, or at these information centres:

- The Chevrolet website at chevrolet.ca
- The GM Customer Care Centre at 1-800-GM-DRIVE (1-800-463-7483 or 1-800-263-3830 for TDD users).

A WORD ABOUT THIS BROCHURE Some of the equipment shown or described throughout this brochure may be available at extra cost. We have tried to make this brochure comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colours, materials, equipment, specifications, models and availability. Specifications, dimensions, measurements, ratings and other numbers in this brochure and other printed materials provided at the dealership or affixed to vehicles are approximates based upon design and engineering drawings and prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been updated since the time of printing, please check with your Chevrolet dealer for complete details. General Motors of Canada Company reserves the right to lengthen or shorten the model year for any product, for any reason, or to start and end model years at different times. Certain vehicle features may lose their usefulness over time due to obsolescence from technological changes. Unless otherwise noted, all claims based on the latest available competitive information. Excludes other GM vehicles.

POWERTRAIN Chevrolet products are equipped with engines and/or propulsion systems produced by GM Powertrain or other suppliers to GM worldwide. The powertrain components in Chevrolet products may also be used in other GM makes and models.

ASSEMBLY Chevrolet vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Chevrolet vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest you verify that your vehicle includes the equipment you ordered and that, if there were changes, they are acceptable to you.

SPARE TIRE INFORMATION There is no standard jack or spare tire in the Chevrolet Bolt EV. Your vehicle has a tire sealant and compressor kit that uses a liquid tire sealant to temporarily seal up to a 6 mm (.25 in.) puncture in the tread area of the tire. After using the tire inflator kit, it is recommended that you take the tire to an authorized retailer for inspection and repair as soon as possible, but at least within 160 kilometres of driving. The tire sealant cannot seal and inflate sidewall damage, punctures larger than 6 mm (.25 in.), or a tire that has unseated from the wheel. The sealant can only be used on one tire and for one time before its expiration date.

AN IMPORTANT NOTE ABOUT ALTERATIONS AND WARRANTIES

Installations or alterations to the original equipment vehicle (or chassis) as distributed by General Motors are not covered by the General Motors New Vehicle Limited Warranty. The special body company, assembler, equipment installer or upfitter is solely responsible for warranties on the body or equipment and any alterations (or any effect of the alterations) to any of the parts, components, systems or assemblies installed by GM. General Motors is not responsible for the safety or quality of design features, materials or workmanship of any alterations by such suppliers.
